

A global packaged food manufacturer reduced their purchase order cycle time by 30% with SAP BTP

Revenue
\$ 4.5 Billion

Industry
**Consumer
Packaged Goods**

Business outcomes

- Simplify the data entry process to enable raw material traceability, reporting, and quality control
- Add customizations in the existing supplier portal to simplify the documentation process for suppliers
- Modify the UX of the supplier portal
- Enhance planning and analytics capabilities based on procurement data

Results

- 30% reduction in purchase order cycle time
- 15% increase in the supplier compliance rate
- Visibility established across procurement and supplier management processes
- Frictionless supplier onboarding and purchase order management

YASH value proposition

- Co-innovate with client IT team to create extensions of their supplier management and procurement management applications
- Extensions created on Business Application Studio in Cloud Foundry Environment of SAP BTP to add document automation, traceability data-entry, and reporting
- Modify UX on iOS and Android apps with SAP mobile SDKs on Business Application Studio
- Integrate the procurement data warehouse with SAP HANA, SAP Analytics Cloud, and SAP BPC to strengthen business planning and predictive analytics
- Create intuitive dashboards for procurement and supplier management processes
